Dear Sir or Madam,

We are emailing to register our concerns that fields around Lyddington have been identified as potentially suitable for solar and wind farms on a very significant scale.

Please can we be assured that before any of these are formally considered that a full impact study would be commissioned?

Not only would they be visually unappealing, but they could have a massive impact on birdlife and wildlife more generally. The rolling hills beside the A6003 are so beautiful with the reservoir on one side, and views across the valley on the other.

There must surely be more appropriate sites.

Please keep us informed.

Kind regards,

Gerard and Sally Nieuwenhuys.
